www.frazereastman.co.uk

SUMMARY:

Front-end developer with a masters degree in advanced computer science and professional experience building accessible, high-performance web applications using React and Vue. A motivated, creative individual with a keen focus on front-end architecture, WCAG 2.2 compliance, performance optimisation, and close collaboration with designers to deliver intuitive, user-centred UI and UX.

PROFESSIONAL SKILLS:

Front-End Development:

JavaScript (ES6+), TypeScript, HTML5, CSS3 · React, Vue.js, component-driven front-end architecture, DevEx focused codebases

State Management:

Vuex, Pinia, Redux · Complex client-side state · Async data flows and large data models

Tooling & Build Systems - Vite, Webpack · ESLint, Prettier · Developer Experience (DevEx) focused workflows

Accessibility & UX - WCAG 2.2 compliance · Full

site-wide accessibility audits · Accessibility-first UI implementation · Close collaboration with designers on UI/UX and usability

Market Research:

Performance auditing, Lazy loading, code splitting, bundle size optimisation · Unit testing (Vitest)

APIs & Integration - REST API integration, High-volume data handling, communicating with internal and external APIs

WORK EXPERIENCE:

Front-End Developer

Find A University, Sheffield, UK - July 2025 - December 2025

- Led a project aimed at improving accessibility across customer facing sites to meet WCAG 2.2 guidelines.
- Contributed to early-stage design decisions by reviewing Figma prototypes and providing feedback focused on user impact, accessibility and usability.
- Built a custom HubSpot serverless component to improve productivity for a core internal team.

Front-End Developer

Made by Sauce, Remote - March 2023 - June 2025

- Developed and maintained zero-downtime solutions supporting high-volume customer traffic for major insurance brands.
- Built modular, reusable front-end components in Vue.js and React, guided by front-end architecture best practices.
- Built front-end solutions with complex state management, efficiently handling large data payloads from multiple APIs.

Junior Full-Stack Developer

One Call Insurance, Doncaster, UK - October 2022 - March 2023

- Worked across the full stack on legacy PHP projects, utilising vanilla javascript on the front-end.
 - As a Junior developer, led a front-end project developing a high-capacity breakdown journey
 - Fixed the company's documentation and documented our in-house component library in vue-press.
-

Software Development Intern

Experian, Remote – Summer 2022

- Participated in an internship scheme for high achieving graduates.
 - Was tasked with doing a feasibility assessment for the conversion of existing projects to use a custom React component library.
 - Set up communication channels with a team in America in order to gain vital project information.
-

EDUCATION:

MSC – Advanced Computer Science – 2021 – 2022 – Merit

The University of Sheffield, Sheffield, UK

- Completed advanced computer science modules including Artificial Intelligence and Data Modelling
- Delivered a team-based development project that achieved the highest mark in the module, demonstrating strong collaboration and problem-solving.
- Managed social media strategy and content for a university society, building communication and engagement skills
- Self funded my study working as a GCSE mathematics tutor and delivery driver

BSC – Advanced Computer Science – 2018 – 2021 – 1st Class Hons

De Montfort University, Leicester, UK

- Graduated with a First Class degree, gaining strong foundations in programming, data structures, databases, and Agile methodologies
 - Participated in a university volunteering programme, teaching programming concepts to primary-aged students
 - Elected Course Representative, acting as a liaison between students and academic staff
 - Chaired the Chess Society, expanding participation by entering local leagues for the first time and establishing an ongoing partnership with the University of Leicester Chess Club
-

Ways of Working:

- Worked within Agile / Scrum environments, participating in daily stand-ups, sprint planning, and sprint retrospectives.
- Utilised the Atlassian suite, particularly Jira, to manage and update tickets and create streamlined Kanban boards tailored to business needs.
- Closely collaborating with designers using Figma and Adobe XD and regular meetings, providing accessibility, UI and UX feedback throughout the design process.
